Overdraft Eligibilty Checker

Aim:

To bulid a system using COBOL that checks whether an account qualifies for a small overdraft facility

Algorithm:

Step 1: Start the program.

Step 2: Accept the values of salary , monthly debt , overdraft request amount from the user as input.

Step 3: Check whether the monthly debt is less than 40% of salary and the requested overdraft is less than the twice of the salary.

Step 4: If both the conditions are met then print “ELIGIBLE” else print “NOT ELIGIBLE”.

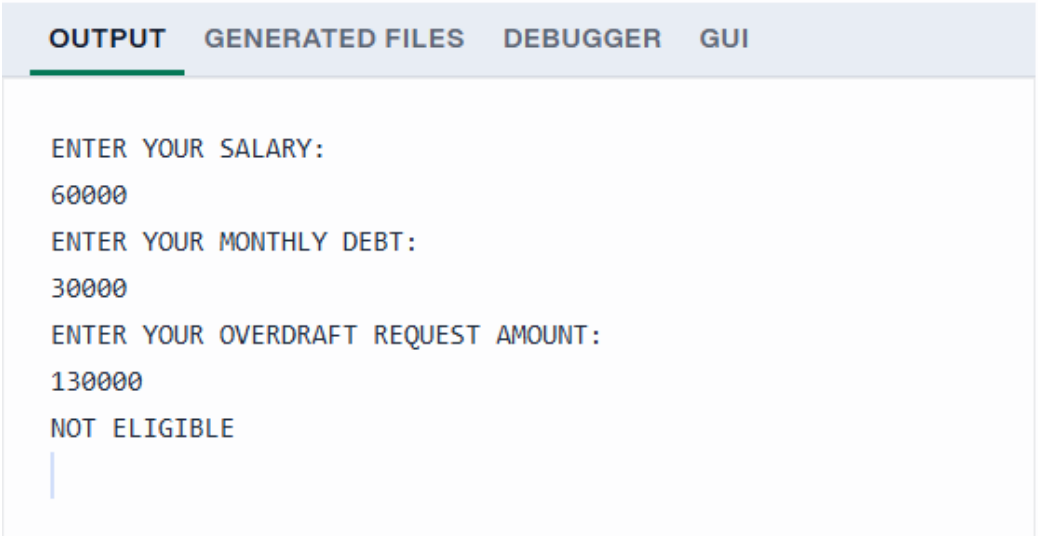

Step 5: Stop the program.

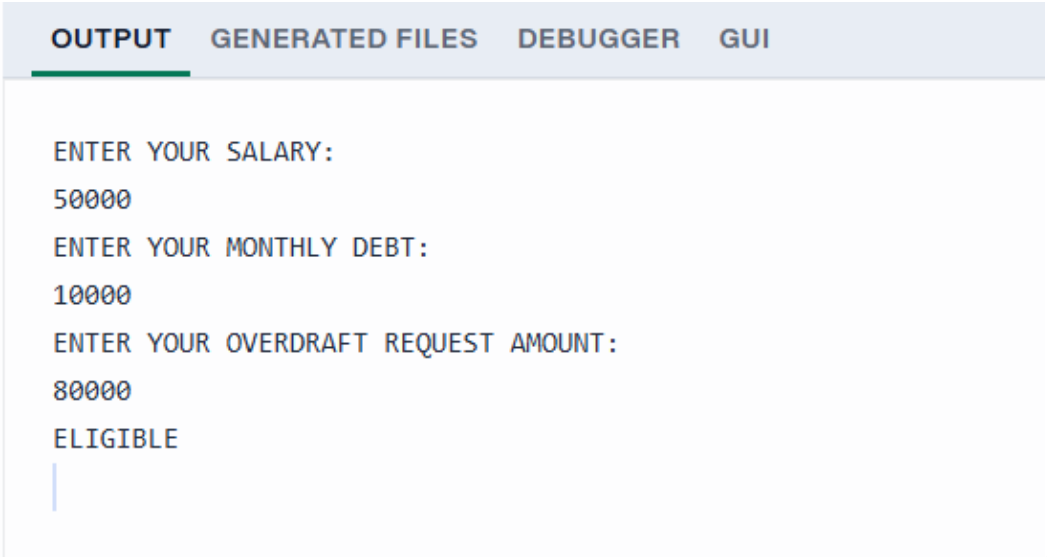

Code:

```
IDENTIFICATION DIVISION.
PROGRAM-ID. OVERDRAFT-CHECKER.
DATA DIVISION.
   WORKING-STORAGE SECTION.
      01 salary  PIC 9(8).
      01 debt PIC 9(8).
      01 draft PIC 9(8).
PROCEDURE DIVISION.
   DISPLAY "ENTER YOUR SALARY:"
   ACCEPT salary
   DISPLAY "ENTER YOUR MONTHLY DEBT:"
   ACCEPT debt
   DISPLAY "ENTER YOUR OVERDRAFT REQUEST AMOUNT:"
```

```
    ACCEPT draft
    IF debt<=((salary*40)/100) AND draft<=(salary*2)
       DISPLAY "ELIGIBLE"
    ELSE
       DISPLAY "NOT ELIGIBLE"
    END-IF.
STOP RUN
```

Output:

.

Result:

Thus a overdraft eligibility checker using COBOL is executed successfully and

the expected output is obtained.
